

AWS Cloud Practitioner Course Outline

Course Overview

The AWS Cloud Practitioner course is intended for individuals who want to learn skills and abilities to demonstrate basic knowledge of the AWS platform, including: available services and their common use cases, AWS Cloud architectural principles (at the conceptual level), account security, and compliance. This course also provides all materials and information individuals need to study and prepare for the AWS Certified Cloud Practitioner exam (CLF-C01). Voucher not included.

Course Objectives

By the end of the course, you will be able to:

- Explain the value of the AWS Cloud.
- Understand and explain the AWS shared responsibility model.
- Understand AWS Cloud security best practices.
- Describe and position the core AWS services, including compute, network, databases, and storage.
- Identify AWS services for common use cases.

| Public Live , Virtual Class | 10:00 – 5:00 Eastern Time |
| Course Materials Provided | Digital student manual and materials |
| Course Price | \$795 USD; Discounts available: \$100 discount available for 3 or more students. \$100 early enrollment (cannot be combined). Call or email us for details. |

Prerequisites

Anyone who works within the IT discipline including traditional and non-traditional project managers, IT managers, sales managers, decision makers, and marketers, as well as those working in finance, procurement, and legal departments are ideal candidates to attend this training. Basic understanding of IT services and their uses is strongly recommended.

Prior to taking the CLF-C01 exam, Amazon recommends six months of exposure to the AWS Cloud, basic understanding of IT services and their uses in the AWS Cloud platform, and knowledge of core AWS services and use cases, billing and pricing models, security concepts, and how cloud impacts your business.

Instructor

Your training class is only as good as your instructor.

Pinnacle ProDev, LLC has partnered with a seasoned IT veteran with over 35 years of experience as a Systems Architect, Software Engineer, Database Administrator, and IT Project Manager. He has extensive IT consulting experience for a wide variety of organizations: Fortune 500 corporations, SMB, hospitals, academic institutions, government agencies, and military entities. As a top-ranked instructor with decades of experience, he helps students and organizations resolve operational issues by helping them keep up with demand, work smarter, and recoup the maximum ROI on their IT infrastructure and training investments. He excels in transferring his real-world knowledge to his participants and in preparing participants to sit for the applicable certification exam.
